

## Electric charging during your visit

On our premises, you will find charging points provided by Dayser Energy, so you can easily charge your electric car during your stay.

Whether you're here for work, leisure or an appointment: your vehicle is safely parked and being charged at the same time. That means no extra stops, no detours and no waiting time at external charging points.

Charging is simple and accessible to everyone. You don't need an app or to register. You can pay as you normally would, for example with your debit card, creditcard or charging card.

With this facility, we are contributing to more sustainable mobility and making your visit just that little bit more comfortable.
